MAIN FEATURES

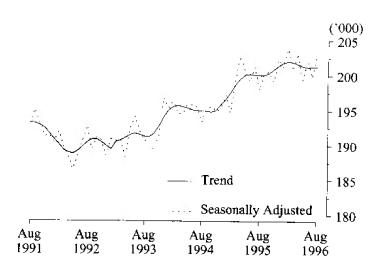

EMPLOYMENT

State comparisons trend estimates

The Australian and State *trend series* comparisons are given on page 25. There was an increase of 0.7% in Tasmania's employment over the year to August 1996. The largest increase in employment was in Queensland (1.9%). Next followed Western Australia (1.6%), Victoria (1.4%), South Australia (0.8%), and New South Wales (0.6%).

EMPLOYMENT, TASMANIA

Regional comparisons original terms In the Hobart and Southern Statistical Divisions the estimate of employment in *original* terms was 98,900 in June 1996, compared with 101,700 in June 1995. The estimate of employment in the Northern Statistical Division was 58,000 in June 1996, compared with 54,200 in June 1995. The estimate of employment in the Mersey-Lyell Statistical Division was 44,300 in June 1996, compared with 42,600 in June 1995. (See tables 3–8, pages 2–7.)

THE LABOUR FORCE

Trend estimates

There were an estimated 225,300 persons (based on *trend* estimates) in the labour force in August 1996, and an estimated 368,800 civilian Tasmanians aged 15 or more, yielding a labour force participation rate of 61.1%, compared with 60.1% in August 1995.

For males, the *trend* estimate of the participation rate was 72.1%, compared with 70.1% for August 1995. For females, the *trend* estimate of the participation rate was 50.4%, compared with 50.5% in August 1995.

Source: Labour Force, Australia, Preliminary, ABS catalogue no. 6202.0.

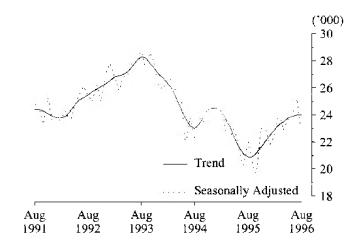

UNEMPLOYMENT

Trend estimates

The Tasmanian *trend* estimate of 24,000 unemployed persons in August 1996 was an increase of 3,100 on the figure for August 1995. The *trend* estimate of the unemployment rate was 10.6% in August 1996, compared with 9.5% in August 1995.

Source: Labour Force, Australia, Preliminary, ABS catalogue no. 6202.0.

UNEMPLOYMENT, TASMANIA

EMPLOYED WAGE AND SALARY EARNERS

Original terms

In *original* terms, there were approximately 137,600 employed wage and salary earners in Tasmania in March 1995. In March 1993 the figure was 147,100 employed wage and salary earners.

In *original* terms, the Tasmanian public sector accounted for 31.7% of all employed wage and salary earners in February 1995. Overall, the category Community services had the highest industry representation — 27.8% — compared with the equivalent figure of 24.9% recorded in February 1993. The next highest industry grouping was Wholesale trade and Retail trade (19.4%, compared with 20.8% in February 1993) and Manufacturing (15.2%, compared with 14.8% in February 1993).

In *original* terms, women made up 45.5% of employed wage and salary earners in February 1995. In February 1993, the equivalent figure was 44.8%.

Source: Employed Wage and Salary Earners, Australia, ABS catalogue no. 6248.0.

AWARD RATES OF PAY INDEXES

Original terms

The annual movements from July 1995 to July 1996 of weekly award rates of pay indexes for Tasmania were 0.5% for full-time adult females and 1.0% for full-time adult males, for a combined annual increase of 0.9%. For Australia, the figures were 1.0% for females and 1.0% for males, for a combined annual increase of 1.0%.

For full-time adult female employees in Tasmania, the largest industry increases over this 12-month period occurred in the Public administration and defence industry (1.8%); and the Manufacturing industry (1.4%).

For the same period for full-time adult male employees in Tasmania, the largest industry increases occurred in the Transport and storage industry (3.0%); and the Manufacturing industry (1.7%).

The largest occupation increase over the same period for full-time adult female employees occurred in Tradespersons (1.6%); and Plant and machine operators, and drivers (1.1%).

For full-time adult male employees the largest occupation increases over the same period occurred in Plant and machine operators, and drivers (2.0%); and Clerks (1.1%).

Source: Award Rates of Pay Indexes, Australia, ABS catalogue no. 6312.0.

BUILDING MATERIALS PRICE INDEXES

Original terms

The price index for house building materials in Hobart decreased by 0.1% for the twelve months ending July 1996, compared with increases of 5.2% for the twelve months ending July 1995, and 1.8% for the equivalent period in 1993.

For materials used in other than house building, the price index in Hobart rose by 1.0% for the year ending July 1996, compared with 3.5% for 1995, and 1.8% in 1993.

Building components which registered the highest change in Hobart over the year to July were paint and other coatings(up 8.4%) and clay bricks (up 5.4%) A fall of 8.3% was recorded in the price index for structural timber over the year to July 1996, and prices for non-ferrous pipes and fittings fell by 8.8% over the same period.

Sources: Price Index of Materials Used in House Building, July 1996, ABS catalogue no. 6408.0, Price Index of Materials Used in Other Than House Building, July 1996, ABS catalogue no. 6407.0.

LIVESTOCK SLAUGHTERING

Trend estimates

The July 1996 Tasmanian *trend* estimate for the slaughtering of cattle and calves was 1.5% higher than that recorded in June 1996. The number of sheep and lambs slaughtered increased by 1.0%, while the number of pigs slaughtered decreased by 0.8%.

The *trend* estimate of the number of cattle and calves slaughtered was 19,413, which is 3.6% below the 20,129 slaughtered in July 1995.

The *trend* estimate for the slaughtering of sheep and lambs was 64,237 in July 1996, 8.3% below the 70.083 slaughtered in July 1995, and well below the estimate of 99,472 slaughtered in July 1994.

The *trend* estimate of 6,449 pigs slaughtered in July 1996 was 12.2% below the 7,345 slaughtered in July 1995. This was the seventh successive month of decline in the number of pigs slaughtered in Tasmania.

(See table 21, page 16.)

BUILDING APPROVALS

Original terms

There were 121 new dwelling units approved during July 1996 in Tasmania. This was a decrease of 37.6 % on the number recorded for June 1996 (194) and a 43.2 % decrease on the number recorded for July 1995 (213).

For the twelve months ended July 1996 there were 2 447 new dwelling units approved, 20.4 % below the 3 076 units recorded for the twelve months ended July 1995.

The value of all building approved, at current prices, in July 1996 was \$50.0 million, 59.9 % above the June 1996 figure of \$31.3 million and 70.6 % above the July 1995 figure of \$29.3 million. (See table 27, page 20.)

GROSS STATE PRODUCT

Trend estimates

Tasmanian Gross State Product grew 0.8% in the June quarter, as measured by the *trend* series at current prices. Tasmanian growth was below the national *trend*, with Australian Gross Domestic Product growing 1.4% during the June quarter. Western Australia recorded the highest quarterly growth with 2.0%, while Tasmania and South Australia recorded the lowest with 0.8%.

Tasmania's annual increase in Gross State Product (June 1995 to June 1996) as measured by the *trend* series at current prices was 4.6%. Tasmanian annual Gross State Product growth was below the national *trend*, with Australian Gross Domestic Product growing 6.8% during the same period. Western Australia experienced the largest annual increase of 10.2%, while Tasmania and the Northern Territory experienced the lowest of 4.6%.

Sources: Australian National Accounts, State Accounts, June quarter 1996, ABS catalogue no. 5242.0, National Income, Expenditure and Product, Australian National Accounts, June quarter 1996, ABS catalogue no. 5206.0.

PRIVATE NEW CAPITAL EXPENDITURE

Original terms

Total new capital expenditure in Tasmania, for the June quarter 1996 was \$154 million. This was 10.0 % above the \$140 million recorded in the March quarter 1996 but 27.0 % below the June quarter 1995 figure of \$211 million.

The total new capital expenditure in Tasmania in 1995-96 was \$580 million, 8.8 % below the \$636 million recorded in 1994-95. (See table 30, page 21.)

SURVEY OF TOURIST ACCOMMODATION

Original terms

The room occupancy rate in hotels, motels and guest houses in Tasmania decreased from 48.4% in June quarter 1995 to 46.7% in June quarter 1996. During the same period the number of rooms available increased by 2.1%, from 5,408 to 5,523.

Accommodation takings for hotels, motels and guest houses in Tasmania recorded a decrease of 0.8% from \$18.0 million in June quarter 1995 to \$17.8 million in June quarter 1996.

The unit occupancy rate for holiday units decreased slightly from 43.6% in June quarter 1995 to 43.3% in June quarter 1996 while units available increased by 1.9% over the same period. Takings from accommodation were virtually unchanged in the same period.

Caravan park sites and cabins available decreased by 2.2% from 6,625 in June quarter 1995 to 6,479 in June quarter 1996. Site occupancy rate increased from 30.3% in June quarter 1995 to 30.5% in June quarter 1996 and takings increased from \$1.5 million to \$1.6 million in the same period.

(See table 33, page 23.)

NEW MOTOR VEHICLE REGISTRATIONS

Original terms

There were 1,341 new motor vehicles (excluding motorcycles) registered in Tasmania during July 1996. This was 34.9% above the 994 registered in June 1996 and 30.3% above the figure for July 1995 (1,029).

The increase in July 1996 was due to the registration of 355 more passenger vehicles than in the previous month. Passenger rental vehicles accounted for 227 of these registrations. (See table 34, page 24.)

RETAIL

Trend estimates

The *trend* estimate of turnover for July 1996, for Australia (\$10,304.2 million), was 5.2 % higher than for July 1995 (\$9,793.0 million). The *trend* estimate of retail turnover increased by 0.4 % between June 1996 and July 1996.

Source: Retail Trade Australia, ABS catalogue no. 8501.0.

The *trend* estimate for turnover of retail and selected service establishments for July 1996, in Tasmania, was \$248.1 million, an increase of 4.7 % on the July 1995 figure of \$237.0 million.

Original terms

In *original* terms, the estimate of retail turnover in July 1996, for Tasmania, was \$235.7 million. 4.6 % above the figure recorded for July 1995 (\$225.3 million). (See table 35, page 24.)

Changing productivity per staff-hour makes these indicators unsatisfactory for long-term comparisons.

Metallurgical refining index (Base: 1979–80 = 100.0) Output from selected establishments covering the smelting and refining of ferro-alloys, zinc and aluminium. The weighting pattern is based on the establishments' value added as derived from the 1979–80 Manufacturing Census. For multi-product establishments, value added was apportioned to products on the pass of gross receipts from each product.

Includes the whole milk equivalent of faither collinguishments and products on the pass of gross receipts from each product.

Includes butter equivalent of butter oil.
Includes spinning, weaving and carpet making. Reported by establishments which manufacture textiles only, or manufacture clothing and textiles in the one plant.

Excludes production of directory newsprint and high grade specialty paper.

TOTAL PASSENGER ARRIVALS BY AIR AND SEA, TASMANIA: Original, seasonally adjusted and trend

		Seasonally			
Period	Original 	adjusted [±]	Trend		
1995					
June	65 035	78 183	77 636		
1996					
April	82 153	75 312	78 876		
May	66 033	83 587	80 039		
June	68 888	82 722	81 326		

There is an annual recalculation of seasonal adjustment factors to include the most recent year's arrivals. This occurs at the end of each financial year and may cause revisions to previously published seasonally adjusted and trend figures. A full time series of seasonally adjusted and trend series from January 1971 is available on request, telephone (002) 20 5870. (Source: Department of Tourism. ABS unpublished data.)

The following persons are not included in these statistics: passengers under three years of age accompanied by an adult; passengers travelling on chartered flights with minor carriers, passengers travelling on private or VIP flights; and passengers from or departing for overseas other than direct flights to New Zealand.
 The proportion of departing passengers who were visitors was shown to be about 58% in the 1981 Tasmanian Visitor Survey, 53% in the 1986 Tasmanian Visitor Survey, 65% in the 1990 Tasmanian Visitor Survey, 60% in the 1994 survey, and 58% in the 1995 Tasmanian Visitor Survey.

EXPLANATORY NOTES

INTRODUCTION

1 This publication contains latest figures for a comprehensive range of economic indicators. Statistics shown in this publication are the latest available at the date of preparation and may be subject to revision in subsequent issues. In a number of cases figures appearing in this publication are preliminary and are subject to revision in subsequent issues. Reference should therefore always be made to the latest issue or to the statistical publication on the specific subject.

SEASONAL ADJUSTMENT AND TREND ESTIMATION

- 2 Seasonal adjustment is a means of removing the estimated effects of normal seasonal variation from the series so that the effects of other influences on the series can be more clearly recognised. Seasonal adjustment does not aim to remove the irregular or non-seasonal influences which may be present in any particular month. This means that month-to-month movements of the seasonally adjusted estimates may not be reliable indicators of trend behaviour.
- 3 The smoothing of seasonally adjusted series reduces the impact of the irregular components of the seasonally adjusted series and creates trend estimates. These trend estimates are derived by applying a 13-term Henderson-weighted moving average to all months except the last six. The last six monthly trend estimates are obtained by applying surrogates of the Henderson average to the seasonally adjusted series. Trend series are used to analyse the underlying behaviour of the series over time.
- 4 While this smoothing technique enables estimates to be produced for the latest month, it does result in revisions to the most recent months as additional observations become available. Generally, subsequent revisions become smaller and after 3 months have a negligible impact on the series. Revisions also occur as a result of the annual review of seasonal factors.
- 5 Users may wish to refer to the ABS Publication A Guide to Interpreting Time Series - Monitoring 'Trends' - An Overview (1348.0) for more detailed information on smoothing seasonally adjusted time series data.

RELATED PUBLICATIONS

6 Current publications produced by the ABS are listed in the Catalogue of Publications and Products (1101.0). The ABS also issues, on Tuesdays and Fridays, the Release Advice (1105.0) which lists publications to be released in the next few days. The Catalogue and Release Advice are available from any ABS office.

UNPUBLISHED STATISTICS

7 As well as the statistics included in this and related publications, the ABS may have other relevant unpublished data available. Inquiries should be made to Information Inquiries on (002) 20 5800 or to any ABS office.

EFFECTS OF ROUNDING

8 Some figures have been rounded and discrepancies may occur between totals and sums of the component items,

SYMBOLS AND OTHER USAGES

not yet available n.y.a. not applicable nil or rounded to zero р preliminary—figure or series subject to revision figure or series revised since previous issue

For more information . . .

The ABS publishes a wide range of statistics and other information on Australia's economic and social conditions. Details of what is available in various publications and other products can be found in the ABS Catalogue of Publications and Products available from all ABS Offices.

ABS Products and Services

Many standard products are available from ABS bookshops located in each State and Territory. In addition to these products, information tailored to the needs of clients can be obtained on a wide range of media by contacting your nearest ABS Office. The ABS also provides a Subscription Service for standard products and some tailored information services.

National Dial-a-Statistic Line
